

SHOPPING SPREE – Day 2

Your shopping spree award is **\$7500**.

Use the information you have accumulated to create your shopping list.

- Include the store, item and price.
- Calculate the total spent.
- Indicate whether or not you have earned the \$1000 bonus. You do not have to spend the bonus. It is just your reward for smart shopping.
- Make sure you calculate what 30% of \$7500 is. Remember you can spend no more than 30% of your total at any one store.
- 30% of \$7500 means $30\% \times 7500$. Remember you have to use the decimal equivalent of 30% or 0.3.
- You can use the table on the following page to help you organize spending if you wish, or you can organize your spending with your own system.
- You may use a calculator if you wish; however, if you wish you may use a spreadsheet program such as Excel or Google Sheets to assist you. A small example is included below to show you how it could be done with Excel.

Store	Item	Cost
Sportchek	GT Sport Mountain Bike	759.99
	Asics Running Shoes	99.98
Best Buy	Samsung 65" TV	899.99
West49	Pivot Scooter	199
	Total	1958.96

Happy Shopping!
