

Which One Doesn't Belong

Many of you have already played **Which One Doesn't Belong** (WODB) in class. We have selected questions that use math concepts that you are familiar with. You will be thinking about the numerous reasons why **each** section does not belong to **the set** of the other 3 items. See how many you can find – there are multiple reasons for each! Record your answers ensuring you have a couple for each as a minimum.

$\begin{array}{r} \text{A} \quad 5231 \\ + 4331 \\ \hline 9562 \end{array}$	$\begin{array}{r} \text{B} \quad 3696 \\ + 6939 \\ \hline 10,635 \end{array}$
$\begin{array}{r} \text{C} \quad 1842 \\ + 1614 \\ \hline 3456 \end{array}$	$\begin{array}{r} \text{D} \quad 2184 \\ + 4812 \\ \hline 6996 \end{array}$

For example: Section B does not belong because its answer is an odd number. (The rest in the set are even numbers)

This could also be a fun game to play with siblings, challenge your parents with.
